About me

I am an early stage researcher of Technology Enabled Mental Health (TEAM) for Young People. I hold a bachelor's degree in Computer Engineering and my master's degree is in Medical Informatics. My main interest is to design, evaluate, and deploy health technologies.

Current Research

My PhD project is about developing pervasive cognitive assessment tools including a web-based application called ICAT and a smartwatch-based application for bipolar and depressed patients. The earliest design of the ICAT can be found in our previous publication [1].

Acknowledgements

TEAM has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No. 722561.

Paste the appropriate copyright statement here. ACM now supports three different copyright statements:

- ACM copyright: ACM holds the copyright on the work. This is the historical approach.
- License: The author(s) retain copyright, but ACM receives an exclusive publication license.
- Open Access: The author(s) wish to pay for the work to be open access. The additional fee must be paid to ACM.

This text field is large enough to hold the appropriate release statement assuming it is single spaced.

Every submission will be assigned their own unique DOI string to be included here.
